## AirWatch Installation and Enrollment Step-by-Step for Android

This guide will take you through the installation of the AirWatch Mobile Device Management Agent.

Prior to installing the AirWatch Agent, please ensure you have a sufficiently strong 4G or LTE signal. The installation process may time out if you do not have an adequate signal.

1. Tap on the Google Play Store icon to be taken to the app store.

2. Search for AirWatch
   A. The results will come up.
      - Tap on the AirWatch Agent

   - Tap on the install button to install the AirWatch Agent.

- Once the app has been downloaded and installed, tap "Open"
  - You may be prompted with an "open with" dialog box.
    - If so, choose to open this with the Package Installer.
  - A screen will prompt you to activate the software.
    - Tap Accept.

- The Enrollment Screen will now load.
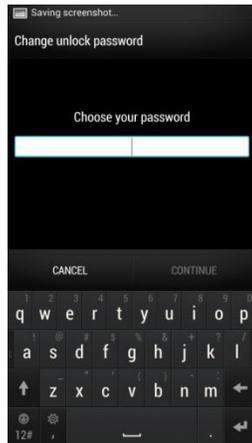

3. Enter your Harvard email address in the address field.
   - Tap "Enroll Device"
   - It may take some time depending upon the strength of your connection to enroll your device.

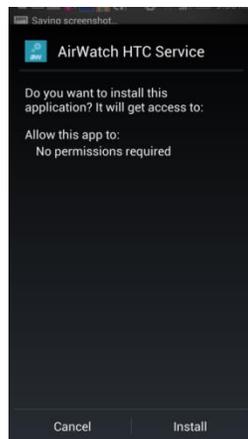

- If enrollment was successful, you can now enter your MSLCC user name and password.
  - This is the user name and password you log into your computer with when you use a MSLCC computer.
  - (ie: username = m9999 password: ********)

4. Once enrollment is complete, the AirWatch Agent will ensure your phone meets the complexity standards, such as if a passcode is necessary, and will prompt you to apply such security measures.
   A. The complexity of the passcode is at least 4 numbers

5. Certain smart phone types may install a service.
   A. For instance, the HTC One will install the AirWatch HTC Service automatically.
   B. There are no options to configure on such service installations.

6. Congratulations, you have just installed the AirWatch Agent. You may now continue to enjoy your smartphone, as a managed mobile device.
